

Information of the company CobiNet Fernmelde- und Datennetzkomponenten GmbH concerning the Regulation EC No. 1907/2006 on the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH)

The REACH regulation ((EU) 2024/2462, SVHC candidate list from 23/01/2025) states that all chemical substances produced in quantities greater than one tonne per year may only be sold in the European Union when they have previously been registered or pre-registered with the European Chemicals Agency (ECHA) in Helsinki, Finland. CobiNet does not produce or import any chemical substances. All products supplied are classified according to Article 3 "Definitions", they are defined as "articles" in the sense of chemical law and not as "substances" or "preparations".

Furthermore, no substance is intended to be released from the products you purchase under normal and reasonably foreseeable conditions of use. According to the requirements of the REACH Regulation, CobiNet is a "downstream user" and is not subject to registration obligations or obligations to prepare safety data sheets.

Furthermore, we assure that the products manufactured by CobiNet do not contain any substances in concentrations above the permissible limits that have been published by the "ECHA" (European Chemicals Agency) in the so-called "Candidate List" as "Substances of Very High Concern" (SVHC).

We assure that we carefully follow the updates of the REACH requirements, in particular the extension of the candidate list or the new inclusion of substances in REACH annexes, and compare them with our substance information. As a downstream user, we will comply with all requirements imposed on us by the REACH Regulation.

If necessary, we will inform you about relevant changes to your products caused by REACH, their ability to be shipped and the quality of the parts we supply to you within the scope of our business relationship.

These statements are based on our current knowledge and experience. We cannot accept any liability for factors beyond our knowledge and control.
